Full Stack Software Engineer

Software Engineer with a background in the veterinary field. My background has helped shape my ability to work efficiently and collaboratively within a team and has allowed me to develop strong communication skills via leading that team. I am always looking for opportunities to learn and develop new skills. My ultimate goal is to build responsive, user-friendly products that help others bring their own goals to life.

Tech Stack

Javascript | MongoDb | Mongoose | Express | React | Node | Liquid | Git | GitHub | Python | Django | PostgreSQL
HTML | CSS | Bootstrap | Canvas
Slack | Zoom | Figma | VS Code | Canva

Software Development Projects

Diabuddy
➔ Diabetes friendly Carb counter application built with the MongoDb, Express, React, Node(MERN) stack.
➔ Implemented Nutritionix API to create a meal from a list of food items to calculate a carb total.
➔ Launched application in 1 week and presented remotely to 30+ colleagues. Deployed on Heroku.

InstaCat
➔ Social Media / Instagram/Cat-Lover based Application built with the MongoDb, Express, React, Node(MERN) stack.
➔ Collaborated with 3 other developers via Git/Github featuring daily standups/standdowns.
